December 7, 2023 (ATLANTA) — The Organization for Safety, Asepsis and Prevention (OSAP) is proud to announce that [Parkell](#), a global leader in dental materials and devices, is the newest Super Sponsor for 2024.

“Parkell is very excited to formalize its relationship with OSAP by becoming a super sponsor, as OSAP’s mission closely aligns with that of Parkell,” says David Mott, President of Parkell. “OSAP has become an absolutely critical resource in the dental industry, due to its tireless role in summarizing and training clinicians about compliance requirements, including infection prevention. This is no simple task given the rapidly changing nature of compliance and given the fact that compliance requirements and recommendations come from both Federal and some State authorities, which adds to the complexity.

“At Parkell, we focus with intensity on building compliance into our products (from decades-trusted USA-built TurboSensor ultrasonic scalers and inserts to our Predicta Bioactive family of cements and restoratives). It is an absolute top priority of Parkell’s, and we could not do it without our strong partnerships with OSAP, thought leaders, and active clinicians. Together, they assist Parkell in defining and developing our current and future products and solutions.”

Parkell will be attending the 2024 OSAP Dental Infection Control Boot Camp in February and is looking forward to networking with like-minded individuals and manufacturers focused on dental infection prevention and safety. For more information about Parkell, please visit www.parkell.com or call (800) 243-7446.

About OSAP

The Organization for Safety, Asepsis and Prevention (OSAP) is the only nonprofit membership association for oral healthcare professionals that focuses exclusively on infection prevention and patient and provider safety. OSAP’s mission is to be the leading provider of infection prevention and control education, training, and credentialing that supports safe dental visits. For additional information, visit osap.org.

About Parkell

Parkell has been designing and manufacturing internationally recognized quality restorative materials and equipment on Long Island, NY for 75 years. Known for advanced material technology like Blu-Mousse® Bite Registration Material and Dryz® Gingival Retraction Paste and generations of high-quality Ultrasonic Scalers and Scaler inserts like the TurboSensor® and Burnett Power-Tip™, Parkell is dedicated to assisting the dental profession with its material and small equipment needs through innovation and collaboration. Consistently looking to produce next-generation products, Parkell has created the Digitest® 3 Pulp Vitality Tester as well as the Predicta Bioactive line of materials that work to restore the tooth the natural way.
