FOR IMMEDIATE RELEASE

August 11, 2017 (ATLANTA) — The Organization for Safety, Asepsis and Prevention (OSAP), a growing community of clinicians, educators, policymakers, consultants, and industry representatives who advocate for the Safest Dental Visit™ has announced that registration is now open for its Dental Infection Control Boot Camp™, Monday, January 8 to Wednesday, January 10, 2018, at the Hilton Baltimore in Baltimore, MD. Federal Services attendees will have additional training sessions on Thursday morning, January 11. The “basic training” program will cover core infection prevention and safety fundamentals for dental practitioners, and offer up to 24 continuing education (CE) hours. Space is limited, so it is important to register early. A special early-bird registration discount is available until October 31, 2017.

The OSAP Boot Camp™ is a crucial building block for every dental professional with infection control responsibilities. The program features national and international experts in infection prevention and safety, presenting a fast-paced, comprehensive curriculum. Attendees receive an extensive resource binder, checklists, tools, and much more.

Although anyone involved with infection control in dentistry would benefit from this course, Boot Camp™ is targeted to dental personnel who desire a strong foundation in infection control, infection control coordinators, educators, compliance officers, federal service employees with infection control responsibilities, federally qualified health center personnel, consultants, and sales representatives.

About OSAP

The Organization for Safety, Asepsis and Prevention (OSAP) is the only dental membership association solely focused on infection prevention and patient safety education. Our members include individual clinicians, group practices, educators, researchers, consultants, trainers, compliance directors, policymakers, and industry representatives who advocate for safe and infection-free delivery of oral healthcare. OSAP focuses on strategies to improve compliance with safe practices and on building a strong network of recognized infection control experts. OSAP offers an extensive online collection of resources, publications, FAQs, checklists, and toolkits that help dental professionals deliver the Safest Dental Visit for their patients. Plus, online and live courses help advance the level of knowledge and skill for every member of the dental team. For additional information, visit osap.org.
