February 18, 2022 (ATLANTA) — The Organization for Safety, Asepsis, and Prevention (OSAP) opens registration for its 2022 Annual Conference. Taking place from June 16-18 in Minneapolis, Minnesota, dental healthcare professionals, educators, consultants, compliance officers, risk managers, and other oral healthcare professionals interested in learning from and networking with industry leaders in dental infection prevention are invited to register.

Infection prevention and safety decision-makers and future-forward thinkers – a who's who of opinion leaders and experts - will come together to learn about current and emerging issues in infection prevention and safety in oral healthcare settings, and share resources and tools to optimize compliance.

This year's conference will feature opportunities for learning and engagement, including plenary sessions, concurrent sessions, and space to connect with exhibitors, sponsors, and innovative thinkers in dental infection prevention, occupational health, and patient safety. The agenda features top speakers from CDC, NIOSH, FDA, The Joint Commission, Accreditation Association for Ambulatory Health Care (AAAHC), academia, and more.

“After two long years apart, we’re thrilled to welcome you to Minneapolis for a safe, in-person experience. Once again, you will be able to reconnect face-to-face with your colleagues, distinguished speakers, and companies that manufacture or distribute infection control products, equipment, or services,” said OSAP Executive Director Michelle Lee. “This year’s conference, Focus on the Future, promises to deliver excellent educational sessions highlighting emerging issues and best practices for infection prevention and patient and provider safety.”

Two registration types are available – In-Person Plus and On-Demand Only. All participants can earn up to 17.5 ADA CERP CE credits. On-demand recordings will be available for registered participants for 60 days following the conference. For more information or to register, visit www.osap.org/annual-conference

About OSAP

The Organization for Safety, Asepsis and Prevention (OSAP) is the only dental membership association solely focused on infection prevention and patient safety education. Our members include individual clinicians, group practices, educators, researchers, consultants, trainers,

compliance directors, policymakers, and industry representatives who advocate for safe and infection-free delivery of oral healthcare. OSAP focuses on strategies to improve compliance with safe practices and on building a strong network of recognized infection control experts. OSAP offers an extensive online collection of resources, publications, FAQs, checklists, and toolkits that help dental professionals deliver the Safest Dental Visit™ possible for their patients. Plus, online and live courses help advance the level of knowledge and skill for every member of the dental team. For additional information, visit www.osap.org.
